IPL Therapy Treatment

At Cocco Paradise Spa has revolutionary technology in Anti-Aging Skin Rejuvenation, Skin Pigmentation, Hair Removal Therapy, Acne Clearance Therapy and Vascular Reduction. The innovative technology, Intense Pulsed Light (IPL) emits through the special Sapphire Crystals producing different wavelength of Spectrum Light in which can be used for the purpose of eliminating freckles, telangiectases and facial blemish, restraining the growth of the hair for a long term, and improving the flexibility and the texture of the skin. The built in Sub-Zero Cooling Technology guarantees to keep the treated area to a cool temperature down to -5 degrees for safe and comfortable treatment.

Anti-Aging/Skin Rejuvenation (Photo facials)

A new approach in Anti-Aging Skin Rejuvenation Therapy to help take years off your appearance. This effective non-surgical facelift method of tightening wrinkles and sagging skin on the face, décolleté, breast and chest area, abdomen and other areas where sagging skin is visible, through intense pulse light therapy can offer a safe, comfortable treatment effectively with no pain, no cuts and proven results.

How does it Work?

The Intense Pulse Light is delivered to the skin through a crystal sapphire deep into the dermis. The gentle light stimulates the collagen which fills in wrinkle and sagging skin, for an overall smooth clear skin tone and a beautiful youthful appearance.

Skin Tone / Pigmentation Reduction

Skin Rejuvenation / Photo facials removes sun damage, redness, skin pigmentation and vascular lesions. The transmitted light would be absorbed by the melanin and converted into heat, which slowly destroy the pigmented lesions. Removes facial veins and stimulates collagen Erases wrinkles and fine lines

Skin Tightening:

Tightens and firms sagging skin | Tones facial muscle and stimulates collagen

Skin Smoothness:

Rejuvenates skin surface, erasing deep wrinkles, fine lines, acne scars and other skin imperfections.

Hair Removal

Recent advances in hair removal therapy, the transmitted light through the sapphire guide crystal gradually destroys the hair follicles resulting long-term to permanent hair reduction.

How does it Work?

The Intense Pulse Light is delivered to the skin through a crystal sapphire deep into the dermis. The gentle light then penetrates to the follicle disabling the active growth of hairs during treatment. Hair growth will vary from slightly by body area which will determine your treatment plan to be customized to obtain optimum results.

Spider Vein / Vascular Removal

Recent advances in spider vein removal therapy without the use of needles and any discomfort or side effects. The light is transmitted into the Dermis layer, stimulating the production of collagen and the Sub-Zero Epidermal cool helps relax the irritated skin.

Acne Treatment

Now, you can clear mild to moderate inflammatory acne without side effects, discomfort, photo-sensitivity or downtime. Acne Clearing treatments utilize a high intensity enhanced light source to permeate the tissue to destroy acne bacteria quickly and easily – with no side effects, no downtime, no pain, and without the exposure to antibiotics.
